This Final Environmental Impact Statement describes three alternatives related to a proposed timber sale and six alternatives related to recreational development opportunities in the Gilbert/Holkham Bay areas of the Tongass National Forest in southeast Alaska. These alternatives have been prepared under the Tongass Land Management Plan (TLMP) allocation. Two No Action alternatives are included in the nine alternatives discussed. One of the No Action alternatives is related to the timber sale proposal, the other No Action alternative is related to the recreational development proposal. The estimated effects of implementing each of the alternatives are discussed. The Forest Service Recommended Action is identified and the rationale for this selection presented.
